

Linux Administration

Description

Infrastructure Support & Linux Administration

- ATMECS & Content Team

Challenges:

- Limited documentation
- Varied flavors and versions across the enterprise
- Space issues due to log files
- Elevated access for developers leading to infrastructure issues

Solution Approach:

- Implementing the RFCs
- Managing the user global access through Third party AD environment
- Solarwinds, Linux Configuration
- Veritas Volume Manager Administration
- Server Patching and year end reboots
- Managing Servers through VMWare VSphere Environment

ATMECS Contribution:

- Implementation of log rotation on multiple servers to save Disk space and which in turn helped in reducing Incident Volumes
- Automated Daily routine tasks to reduce 40% of the tickets
- Automated JBoss services
- Implementing ELK-stack infra in the client environment for Centralized log and Log analysis
