

## Sharepoint Administration

### Description

# Infrastructure Support &?? Sharepoint Administration

- ATMECS &?? Content Team

### Challenges:

- Limited documentation
- Multiple versions across applications including out-of-support ones
- Lack of high availability
- Lots of custom workflows and customization requirements

### Solution Approach:

- Day to day Activities, User Management
- Scheduled backups
- Moving Applications to different environments(DEV, QA, UAT & PROD)
- Implement High availability (Database level)
- Monitoring Server health
- Verifying Memory & CPU utilization
- Configured Remote BLOB Storage (RBS)
- Identifying Server patches and testing on DEV -Environment
- Deploying WSPs in all environments(DEV, QA, UAT & PROD)
- Configuring Search Application and Crawl configurations
- Identifying Application/Server/search/Crawl issues

### ATMECS Contribution:

- Wrote the reusable PowerShell scripts
- Consultancy on developing multiple custom work-flows
- Resolved long-standing Enterprise search issues
- Provided recommendations for Patch installation
- Completed feasibility study based on moving existing applications to AWS and Azure and provided recommendations
