

## Interview Prep

### Description

## Prepare for an interview

During interviews, we're looking for more than a résumé. It's the whole of you that's important. Whether you're still finishing your education or have years of experience, your unique talents and perspective can make our global consulting team stronger.

## Look beyond whats on paper for these interviews.

We dive deeper into the stories of some extraordinary people at ATMECS, from their perspectives.

## What we look for

Our management consulting services focus on our clients' most critical issues and opportunities: strategy, marketing, organization, operations, technology, transformation, digital, advanced analytics, corporate finance, mergers & acquisitions and sustainability across all industries and geographies

### Problem-solving skills

Can you demonstrate an ability to frame complex problems and think creatively to find pragmatic solutions for our clients? We want people who see the world differently and can help us do the same.

### The Ability to Lead

Can you lead and contribute to teams, and also guide leaders through change? It's important to highlight how you've been a leader in past experiences, whether at work, in school or through your extracurricular activities.

### Results Delivery

We have a proud legacy of achieving results that have a positive, measurable impact on our clients' objectives and reputations. We want to hear how you've made an instrumental and quantifiable difference to an organization, project or team's success.

### Passion

Are you enthusiastic about life? Do you have an entrepreneurial drive? Can you inspire others? We're looking for people who challenges themselves to be exceptional and can champion that spirit in others.

## Types of Interviews

Our different interviews are designed to stimulate productive discussions and help us get a better sense of you. The type and number will vary depending on office.

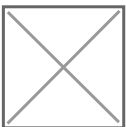

### Experience Interview

Our work designing and developing VR/AR applications serves as a world-class benchmark for innovation.

### Case Interview

Our work designing and developing VR/AR applications serves as a world-class benchmark for innovation.

### Written Case interview

Our work designing and developing VR/AR applications serves as a world-class benchmark for innovation.
