

SQL Developer

Description

SQL Developer

- Posted on April 3rd, 2025

Job Description:

We are seeking an experienced Senior SQL Developer to join our team, with a specific focus on T-SQL. You will be responsible for designing, developing, and maintaining database structures, optimizing queries, and managing complex configurations. All of this must be achieved while adhering to the highest security best practices.

Responsibilities:

- Design, implement, and maintain database structures.
- Develop and update existing stored procedures and functions using T-SQL.
- Research required data and develop complex SQL queries.
- Develop procedures and scripts for data migration.
- Ensure performance, security, and availability of databases.
- Collaborate with other team members and stakeholders.
- Prepare documentation and specifications related to database design and architecture.

Required Skills and Experience:

- Minimum of 8+ years of experience as a SQL Developer.
- Proven work experience as a Senior SQL Developer or similar role.
- Excellent understanding of T-SQL programming.
- Knowledge of SQL Server Management Studio (SSMS), SQL Server Reporting Services (SSRS), and SQL Server Integration Services (SSIS).
- Proficient understanding of indexes, views, handling large data, and complex joins.
- Experience with performance tuning, query optimization, using Performance Monitor, and

- other related monitoring and troubleshooting tools.
- Excellent written and verbal communication skills.

Nice to have

- Research required data and develop complex SQL queries, with a focus on optimizing for multi-tenant environments.
- Ensure data isolation between tenants and manage tenant-specific configurations
